

## Speaker LED Kits

1. Install the speaker per included instructions, adding the following: the 12 volt leads should be towards the top, the speaker leads to the bottom (when back box is closed up) the shorter 12 volt lead to the right side.
2. Once speakers are installed, you will run the 12v lead down into the cabinet on the right side and all the way to the front of the base cabinet.
3. Plug in the 12v lead into the service connector located just inside the coin box above the service outlet on the right side of the game as pictured below:
